Subject: Your M1A mount  
Date: Sun, 30 Nov 2008 05:33:19 -0500

Dear Bill,

Installing your mount was incredibly simple. I have a Burris 8 X 32 Mil dot scope mounted to your SM14-1A mount on my synthetic stocked Springfield M1A rifle. I went to the range for the first time with your set up yesterday and the very first two shots went into the lower portion of the 10 ring. I adjusted my elevation and shot high into the 10 ring for the next 2 shots. I again adjusted and then proceeded to put the next 4 in the x ring. I am shooting this at 100 yards using a 25 foot pistol target. I am so pleased with your product and in my opinion; it is far superior to the Springfield Gen 3 mount I was using.

*I shoot competitive pistol and rifle (also shooting rifle practice with 2 Ohio Police snipers) as well as being a Certified Hunter Education Instructor for the Division of Wildlife for the State of Ohio for the last 10 years. I will be sharing the news about your SM14-1A mount with everyone. I also will be sending a scanned copy of the very first target using your mount later on this week. What a great product.*

Thank you,  
David Jones
