TO Bassett Machine/Brass Works

SUBJECT Scopemount for M1A/M-14

I have used numerous scope mounts for M1A's/M-14's over the span of several years. Yours is equal of the highest priced versions on the market. I have tested both the high and low version and both are excellent. They maintain their zero on the weapon in the heaviest use. They mount and dismount with ease. The simplicity of their design indicates a thoughtful development process. The designed/manufacturer clearly understood the complexities of the weapon and mounting sytem.

I am currently using your mount on my duty sniper rifle. I trust it more than any other that I have tried. Thank you for making an outstanding product.
